

## Feature

### ➤ Suit for LV/ HV voltage system

For low voltage system, direct connect up to 690 V (L-L) AC

For high voltage system, support connect up to 650KV

### ➤ Real-time measurement

True-RMS measuring parameters includes:

U, I, P, Q, S, PF, F, kWh, kvarh, kVAh

### ➤ Demand calculation mode is programmable

2 kinds of demand modes: fixed block and rolling block

### ➤ Power quality analysis

Sag, Swell, THD, 63<sup>rd</sup> Harmonic analysis, crest and K factor, unbalance etc.

### ➤ Multi-tariff billing, historical data of 31 days and 12 months

### ➤ Max./ Min. Record (U, I, P, Q)

### ➤ Under/ over limit alarm

### ➤ DI/ DO

### ➤ Multiple Communication

Optional Modbus RTU protocol, Modbus TCP,

Bacnet, IEC61850

### ➤ High accuracy

Active energy: according to IEC62053-22, class 0.2s

Reactive energy: according to IEC62053-23, class 2

### ➤ Small size and thin style

### ➤ Standard IEC62053-22/ 23, CE.

## Basic Function

<b>Real time metering</b>	Voltage	Ua, Ub, Uc, Uab, Ubc, Uca, UL-L avg, UL-N avg
	Current	Ia, Ib, Ic, In, Iavg
	Power	Pa, Pb, Pc, $\sum P$ , Qa, Qb, Qc, $\sum Q$ , Sa, Sb, Sc, $\sum S$
	Power factor	PFa, PFb, PFc, $\sum PF$
	Energy	kWh, kvarh (4 quadrant) & kVAh
	Frequency	F
	Demand & Max. demand	Dmd_I, Dmd_P, Dmd_Q, Dmd_S
	Max./ min. value	Max./ min. (U, I, P, Q)
	Multi-tariff energy	
<b>Power quality analysis</b>	Unbalance	U_unbl, I_unbl
	Harmonic (63 <sup>rd</sup> )	THDu, THDi, TOHDu, TOHDi, TEHDu, TEHDi, HRU, RHI
	Waveform capture	Real time voltage waveform, Sag, Swell
	Voltage crest factor, current K factor, Load rate, Voltage deviation, Frequency deviation,	
<b>Setpoint alarm</b>	Over/ under limit alarm	
<b>3DI +2 DO</b>	3 status input + 2 relay output	
<b>RS485</b>	Modbus-RTU protocol	
<b>Record function</b>	SOE (event log), Real-time clock ( yyyy-mm-dd hh:mm:ss)	
	Voltage/ frequency deviation, Voltage unbalance record	

## Optional Module

<b>SW</b>	4 status input (External Wet contact)	<b>R</b>	2 relay output
<b>SD</b>	4 status input (External Dry contact)	<b>AO</b>	2 analog output (4-20mA)
<b>LAN</b>	1 Ethernet port	<b>EP</b>	2 pulse output
<b>C</b>	One more RS485 port		

Note: One power meter max. work with 3pcs of optional modules. SW/ SD/ R/ AO can be select 2pcs for one device.

Parameter	Accuracy	Resolution	Measuring Range
Voltage	0.2%	0.01V	10V ~650KV
Current	0.2%	0.001A	50000A
Power	0.5%	0.1W/var/ VA	each phase: 0~649.9MW/ Mvar/ MVA Total: 0~1949.8MW/ Mvar/ MVA
Power factor	0.5%	0.001	-1.000~+1.000
Frequency	0.01	0.01Hz	45~ 65 Hz
Active energy	0.2%	0.1kWh	0~ 99,999,999.9 kWh
Reactive energy	2.0%	0.1kvarh	0~ 99,999,999.9 kvarh
Apparent energy	1.0%	0.1kVAh	0~ 99,999,999.9 kVAh
THD	1.0%	0.001	0~100.0%
Individual harmonic	1.0%	0.001	0~100.0%
Un-balance	1.0%	0.001	0~100.0%

## Technical Specification

<b>Connection mode</b>	3-phase 3-wire 3-phase 4-wire Single phase	<b>Communication</b>	Modbus-RTU Protocol	RS485 serial Baud rate: 2400, 4800, 9600, 19200, 38400bps Address: 1~247
<b>Metering</b>	True RMS, 1 sec refresh time		Modbus-TCP/ Bacnet/ IEC61850 optional	
<b>Input</b>	Rate current: 1A or 5A Rate voltage: Direct 100~398Vph-N CT, PT settable Frequency: 50/ 60Hz	<b>Dimension (L x W x H)</b>	Panel: 96 x 96 x 13.5 mm Cut-out: 90 x 90 x 58.6 mm (basic) 90 x 90 x 80.1 mm (optional module)	
<b>Overload</b>	120% of rated, continuously Instantaneous current: 10 times/ sec Instantaneous voltage: 2 times/ sec	<b>IP index</b>	IP52 (front panel) and IP30 (case)	
<b>Status input</b>	Wet contact or dry contact optional	<b>Weight</b>	Basic unit: approx 550gr. One Module: 50gr.	
<b>Relay output</b>	Node capacity: 250VAC/5A	<b>Environment</b>	Main Module & other Modules	Operating temperature: -10°C~ +55 °C Storage temperature: -40°C~ +70 °C Humidity: 5%~95% non-condensing
<b>Pulse output</b>	Pulse constant: 1000~9999 programmable Pulse width: 60~100ms programmable Formula: 1 pulse = (1 ÷ pulse constant × PT × CT) kWh			<b>Power frequency withstand voltage</b>
<b>Power supply</b>	85 ~265VAC, 85~265VDC	<b>Insulation resistance</b>	≥50MΩ	
<b>Power loss</b>	<10VA	<b>Impulse withstand voltage</b>	4kV (peak), 1.2/50μS	

### Standard (EMC)

Oscillatory Waves Immunity Test	IEC 61000-4-12, Level 3	Surge Immunity Test (1, 2/50μs~8/20μs)	IEC 61000-4-5, Level 3
Electrostatic Discharge Immunity Test	IEC 61000-4-2, Level 3	RF Conducted Immunity	IEC 61000-4-6, Level 3
Radiated Radio-frequency Electromagnetic Field Immunity (RFEMS)	IEC 61000-4-3, Level 4	Power Frequency Magnetic Field Immunity Test	IEC 61000-4-6, Level 3
Electrical Fast Transient/burst Immunity Test	IEC 61000-4-4, Level 3	Electromagnetic Emission Limits	IEC 60255-25, Passed
		Power Frequency Immunity	IEC 61000-4-8, Level A

## Dimension & Installation

Unit: mm

PMAC770H : Panel Mount

## Order Information

PMAC770H--①--②--③

Optional Module

Optional Module

Optional Module

<b>N</b>	No any module
<b>SW</b>	DI Module: 4 Status Input (wet contact)
<b>SD</b>	DI Module: 4 Status Input (dry contact)
<b>R</b>	DO Module: 2 Relay Output
<b>AO</b>	AO Module: 2 Analog output (4~20mA)
<b>N</b>	No any module
<b>SW</b>	DI Module: 4 Status Input (wet contact)
<b>SD</b>	DI Module: 4 Status Input (dry contact)
<b>R</b>	DO Module: 2 Relay Output
<b>AO</b>	AO Module: 2 Analog output (4~20mA)
<b>EP</b>	EP Module: 2 Pulse Output
<b>N</b>	No any module
<b>LAN</b>	1 Ethernet port 10/100M
<b>C</b>	RS485 Module: The 2nd RS485 comm
